VCR MONITOR

1 Vpp/75 Ω

■ GENERAL

Power consumption

330 W

Power supply

For Great Britain and Oceania AC 50 Hz/60 Hz, 230 \sim 240 V

For Continental Europe, F.R. Germany and Italy

AC 50 Hz/60 Hz, 220 V

For Third Region AC 50 Hz/60 Hz, 110 V/127 V/220 V/240 V

Dimensions (W \times H \times D)360 \times 129 \times 305 mm(14-3/16" \times 5-3/32" \times 12")

Weight

6.5 kg (14.3 lb.)

Notes:

- Specifications are subject to change without notice.
Weight and dimensions are approximate.
- Total harmonic distortion is measured by the digital spectrum analyzer.

■ BEFORE REPAIR

- (1) Turn off the power supply. Using a 10Ω, 5 W resistor connect both ends of power supply capacitors (C711, C712, 3300 μF) in order to discharge the voltage.
- (2) Before turning the power supply on, after completion of repair, slowly apply the primary voltage by using a power supply voltage controller to make sure that the consumed current at 50 Hz/60 Hz in NO SIGNAL mode should be shown below with respect to supply voltage 110 V/127 V/220 V/240 V.

Power supply voltage	AC 110 V	AC 120 V	AC 220 V	AC 230 V	AC 240 V
Consumed current 50 Hz	323~754 mA	297~694 mA	160~373 mA	154~360 mA	146~341 mA
Consumed current 60 Hz	316~737 mA	291~679 mA	156~365 mA	150~351 mA	144~336 mA

■ PROTECTION CIRCUITRY

The protection circuitry may have operated if either of the following conditions is noticed:

*No sound is heard when the power is switched ON.

*Sound stops during a performance.

The function of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are "shorted", or if speaker systems with an impedance less than the indicated rated impedance of this unit are used.

If this occurs, follow the procedure outlined below:

1. Switch OFF the power.
2. Determine the cause of the problem and correct it.
3. Switch ON the power once again.

Note:

When the protection circuitry functions, the unit will not operate unless the power is first switched OFF and then ON AGAIN.

■ ACCESSORIES

- AC power supply cord 1
Configuration of AC power supply cord differs according to area.

SJA187..... For (E) (EG) area only.
SJA173..... For (GN) area only
SJA188..... For (EB) area only.
RJA0004 For (GC) area only.
SFDAC05E03 For others.

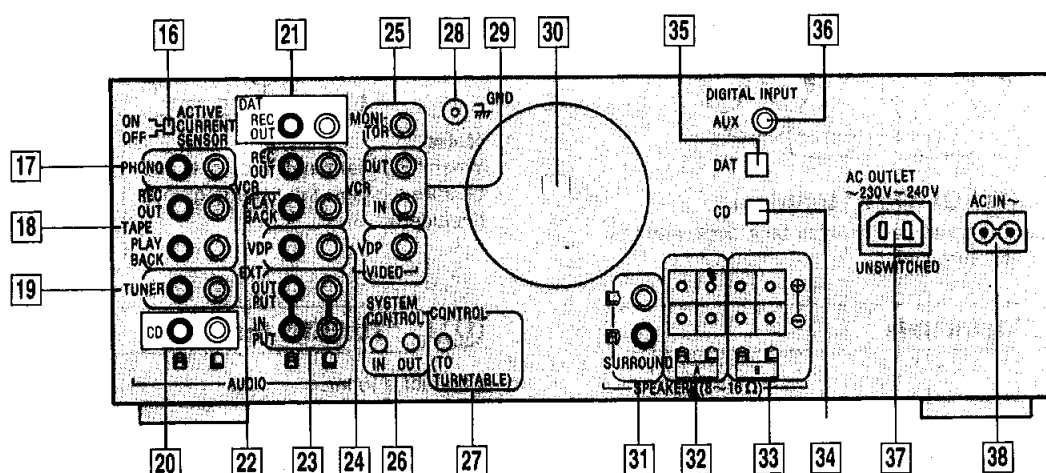

- AC plug adaptor 1

SJP9215 For (GC) area only.

■ LOCATION OF CONTROLS

- | | |
|--|---|

■ CONNECTIONS

Make connections to each component in the system by using stereo connection cables (not included).
See the operating instructions of the tuner (ST-X902L) for details.

Stereo connection cable
White (L) ————
Red (R) ————

Connecting audio components

A "TAPE" terminals

Connect a tape deck.

■ "SYSTEM CONTROL OUT" terminal

This terminal is used to connect a Technics tape deck with the "SYSTEM CONTROL IN" terminal.

B "PHONO" terminals

Connect a turntable.

■ "GND" terminal

This terminal is for use with a turntable which has a ground wire.

■ "CONTROL" terminal

This terminal is used to connect a Technics turntable with the "REMOTE/SYNCHRO REC" terminal.

C "EXT" terminals

Connect a stereo sound processor.

Note:
When these terminals are not in use, be sure to insert the "shorting" pins (included).

D "TUNER" terminals

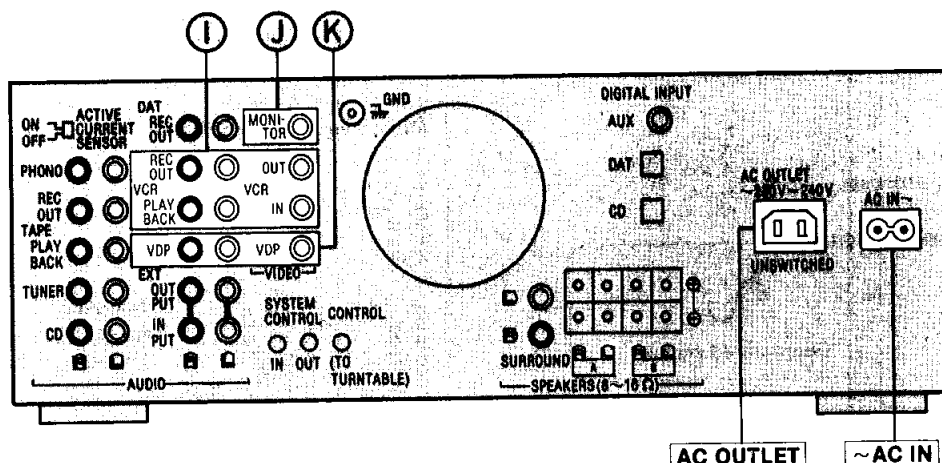

Connect a tuner.

■ "SYSTEM CONTROL IN" terminal

This terminal is used to connect a Technics tuner with the "SYSTEM CONTROL OUT" terminal.

Make connections to each component by using stereo connection cables (not included) and video connection cables (not included).

Connecting video equipment

I "VCR" terminals

Connect a VCR.

J "MONITOR" terminal

Connect a TV.

K "VDP" terminals

Connect a video disc player.

AC outlet ("AC OUTLET")

Do not connect video equipment (such as a TV, etc.) to the AC outlet of this unit. (This outlet is intended for audio equipment.) Do not exceed the indicated power ratings when connecting to this outlet.

"UNSWITCHED" outlet:

Power is always available, regardless of power switch. Audio equipment rated up to 60 W can be connected here.

Note:

The configuration of the AC outlet differs according to area.

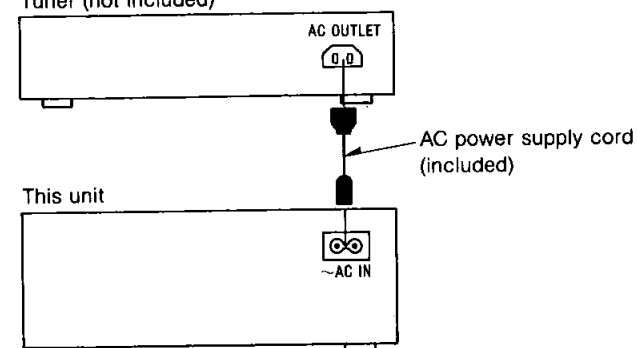

AC power supply cord

Connect the AC power supply cord (included) after all other cables and cords are connected.

Notes:

- Configuration of the AC outlet and AC power supply cord differs according to area.
- If this unit is not to be connected with the tuner, the cord is to be connected to the household AC outlet.

Tuner (not included)

For United Kingdom

Cut off and dispose of the plug and replace with a suitable plug.

Connecting audio components

E "DAT" terminals (ANALOG/DIGITAL)

Connect a digital audio tape deck.
Recordings can be made to the digital audio tape deck.

G "CD" terminal (DIGITAL)

Connect a compact disc player.

F "AUX" terminal (DIGITAL)

Connect a second compact disc player, etc.

H "CD" terminals (ANALOG)

Connect a compact disc player.

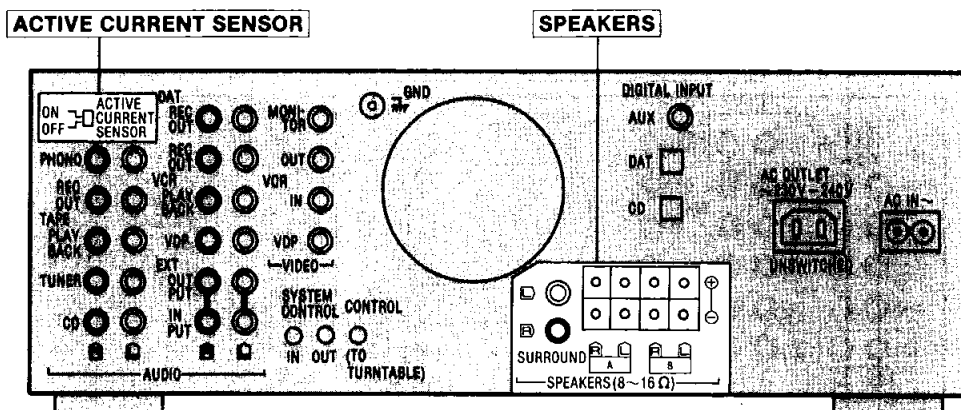

■ "DIGITAL INPUT" (DAT, CD) terminals of this unit

These terminals are protected by dust-protection caps to avoid damage by dust, etc.

Remove the caps only when the "DIGITAL INPUT" terminals are to be used.

When these terminals are not being used, attach the caps as shown in the illustration at right.

Connection of speaker systems

Three pairs of speaker systems (main, second, surround-sound) can be connected to this unit.

Speaker systems that can be connected to any of the speaker connection terminals of this unit are speaker systems with an impedance of 8 to 16 ohms.

Make connections to each speaker system by using speaker cords (not included).

Main speaker systems (not included)

Connect to the "A" terminals.

Second speaker systems (not included)

Connect to the "B" terminals.

Surround-sound speaker systems (not included)

Connect to the "SURROUND" terminals.

- Be sure to connect both speaker systems. If only one side is connected, no sound will be heard.

How to use the active current sensor

The selector is used to enjoy powerful super-bass sound.

ON: Switch ON when connecting the Technics system speakers (SU-X902: SB-CS90, SU-X502: SB-CS90/CS70).

OFF: Switch OFF when connecting speakers other than Technics system speakers.

Notes:

- When connecting speakers other than system speakers, sound from the speakers may not be heard if the selector is pressed ON, because the protecting circuit on the amplifier becomes active.
- The active current sensor activates only for the speaker systems connected to the "A" terminals.

To connect cords to terminals

- Strip off the outer covering, and twist the center conductor.

- Tilt the lever back and insert the cord.

- Close the lever and pull the cord gently to be sure that it is secure.

Note:

Be sure to only connect positive (+) cords to positive (+) terminals, and negative (-) cords to negative (-) terminals.

Note:

To prevent damage to circuitry, never short-circuit the plus (+) and minus (-) speaker wire.

DIGITALIZATION OF AUDIO SIGNALS

Why digitize?

- Audio signals are analog signals with a continuous form.
- When these audio signals are subjected to repeated electronic processing (recording, playback, etc.), they become noisy and distortion occurs, thus resulting in deterioration of the sound quality.
- When these signals are first digitized before processing, they have the following advantages that prevent deterioration of the sound quality:
 - (1) Resistance to noise
 - (2) Extremely low distortion
 - (3) Flat, even frequency response

How signals are digitized

If it is known to what degree of minuteness the human ear can distinguish sounds, it is then possible, by using that data as the standard reference, to digitize them by dividing analog signals into minute pieces, after which they can be transmitted with a high degree of precision, and thereafter recorded and played back in the digitized format.

Analog signals are sampled, quantified and encoded.

Sampling:

Analog signals are minutely sub-divided on the lateral axis.

Quantification:

Sampled signals are minutely sub-divided on the vertical axis.

Digitalization example (recording to CD and play of CD)

Recording to CD

CD play

Former method

This method

What the sampling frequency is

The sampling frequency expresses the degree of minuteness to which signals can be cut, relative to a certain specified time interval, during sampling.

For compact disc sound:

Analog signals are cut 44,100 times (i.e., 44.1 kHz) during one second.

This 44.1 kHz is, therefore, the sampling frequency for compact disc sound.

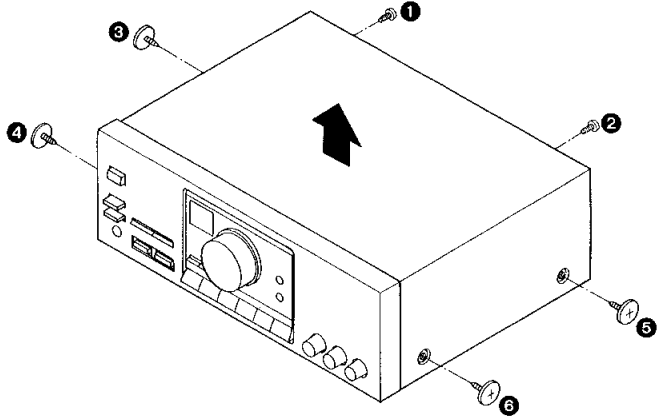

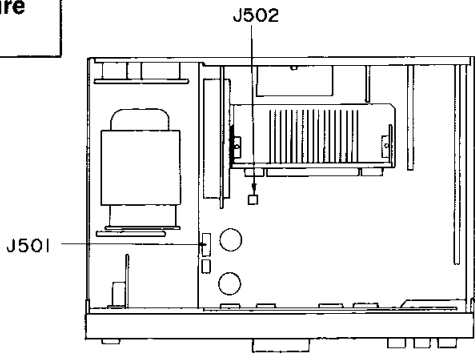

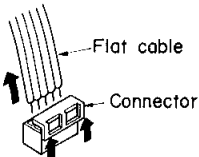

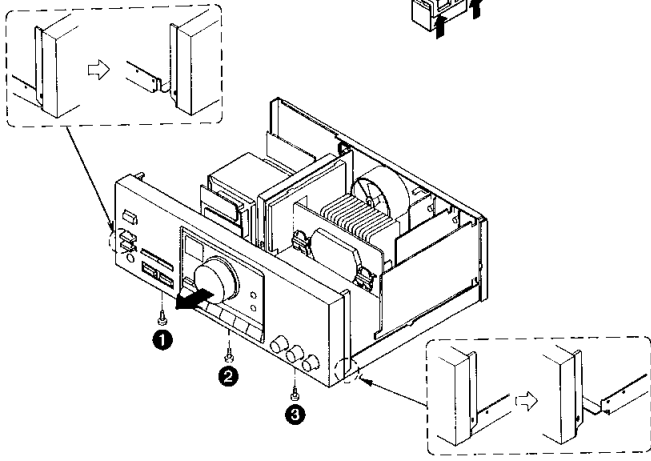

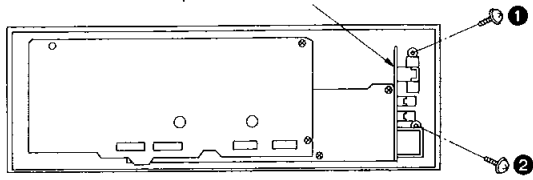

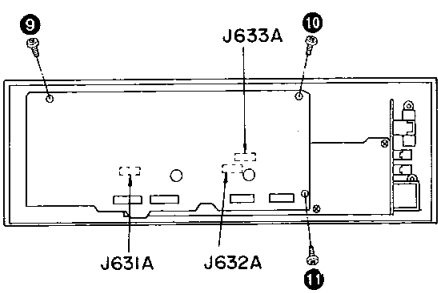

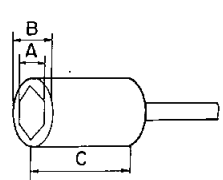

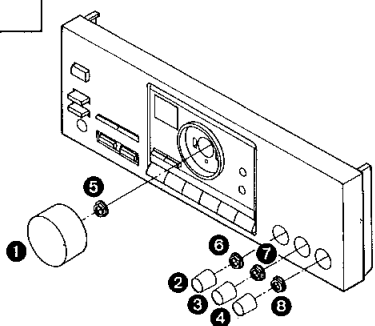

What analog/digital conversion is

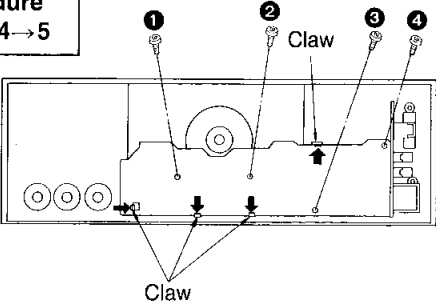

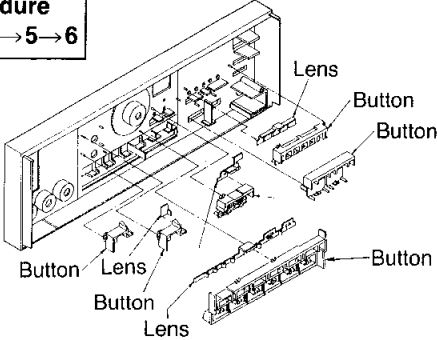

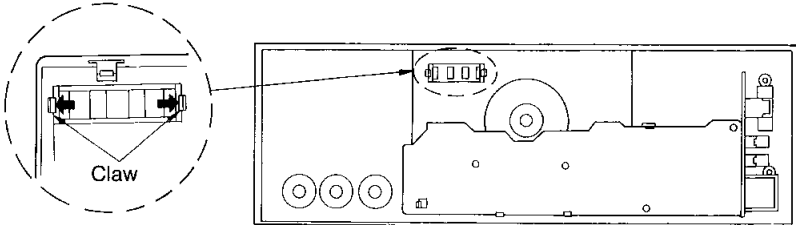

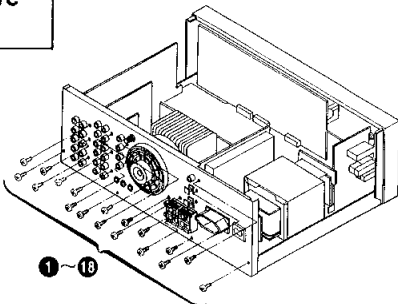

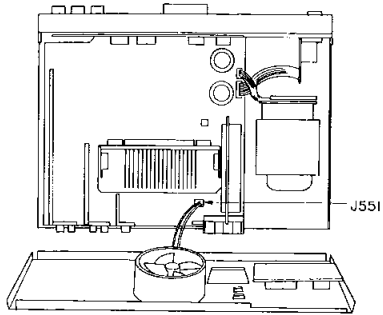

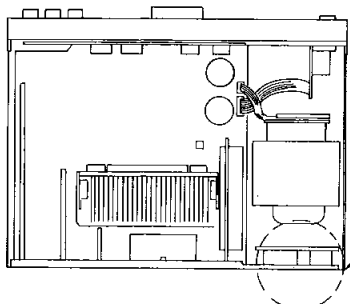

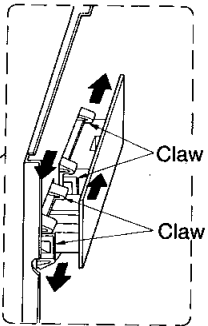

Audio signals (analog signals) are taken out (sampled) at certain fixed time intervals. The points at which this sampling frequency occurs are digitally encoded and converted to digital signals.

What digital/analog conversion is

Each sampling frequency point is returned (converted) to voltage, thus converting digital signals to the analog signals that we can hear.

DISASSEMBLY INSTRUCTIONS

Ref. No. 1	Removal of the Cabinet	Ref. No. 2	Removal of the Front Panel Unit
Procedure 1	 <ol style="list-style-type: none"> 1. Remove the 6 screws (①~⑥). 2. Remove the cabinet in the direction of the arrow. 	Procedure 1→2	 <ol style="list-style-type: none"> 1. Remove the 2 connectors (J501, J502). <p>—Removal of the Connector—</p>

Removal of the P.C.B.s

Procedure
1→8→10

■ Removal of the D/A converter P.C.B.

1. Remove the screw (1).
2. Remove the D/A converter P.C.B. in the direction of the arrow.

■ Removal of the other P.C.B.

- Remove the P.C.B. in the direction of the arrow.

Ref. No.
11

Check of the main P.C.B.

Procedure
1→11

1. Remove the 7 screws (1~7).

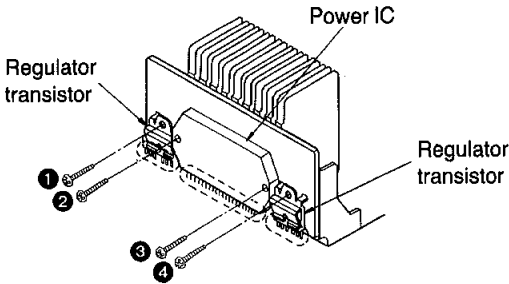

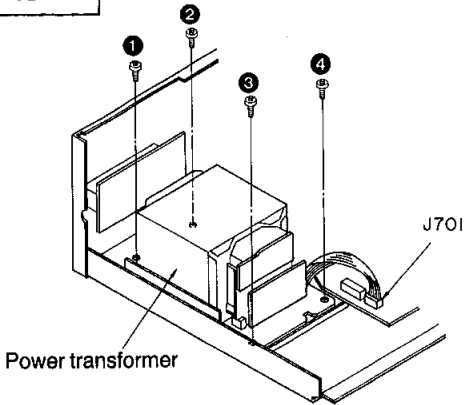

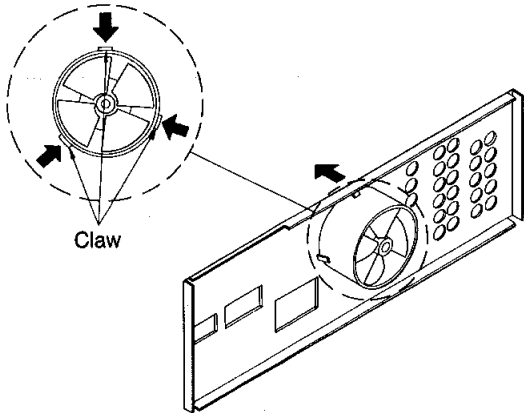

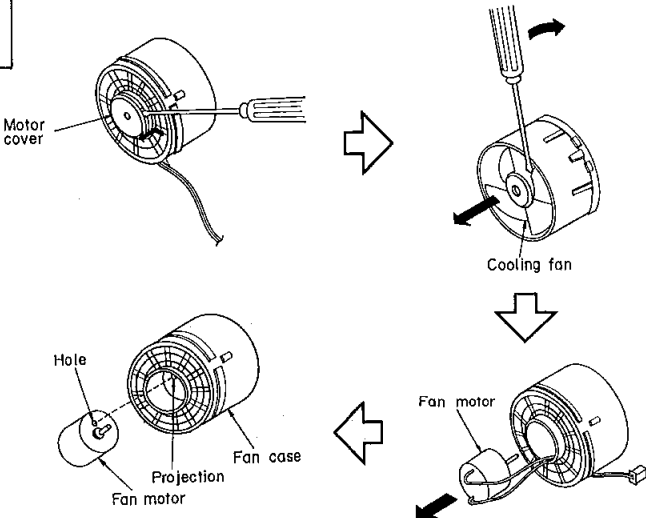

3. Remove the 3 screws (8~10).
 4. Remove the front panel unit in the direction of the arrow.
- *Connect 2 flat cables (J501A, J502).

2. Remove the 4 screws (8~11).

5. Remove the bottom chassis.
6. Reinstall the front panel unit to the main P.C.B.

Ref. No. 12	Removal of the Power IC and Regulator Transistor	Ref. No. 13	Removal of the Power Transformer
Procedure 1→11→12	<ol style="list-style-type: none"> 1. Unsolder the power IC or regulator transistor. 2. Remove the 4 screws (①~④).  <p>Note: When mounting the power IC, or regulator transistor apply silicon terminal compound (SZZ0L15) to the rear of the power IC or regulator transistor.</p>	Procedure 1→13	 <ol style="list-style-type: none"> 1. Remove the 1 flat cable (J701). 2. Remove the 4 screws (①~④).
Ref. No. 14	Removal of the Fan Motor		
Procedure 1→8→14	 <ol style="list-style-type: none"> 1. Remove the 1 connector (J209). 2. Release the 3 claws. 	 <ol style="list-style-type: none"> 3. Insert a screwdriver at the root of the cooling fan. Force it out of the motor shaft. 4. Remove the motor cover by used ⊖ screwdriver. 5. Remove the motor from the fan casing. 6. When mounting the motor fan, align the fan casing's projection with the hole of the fan motor. 	

“ATTENTION SERVICER”

Some chassis components may have sharp edges. Be careful when disassembling and servicing.

●Replacement of the Foot.

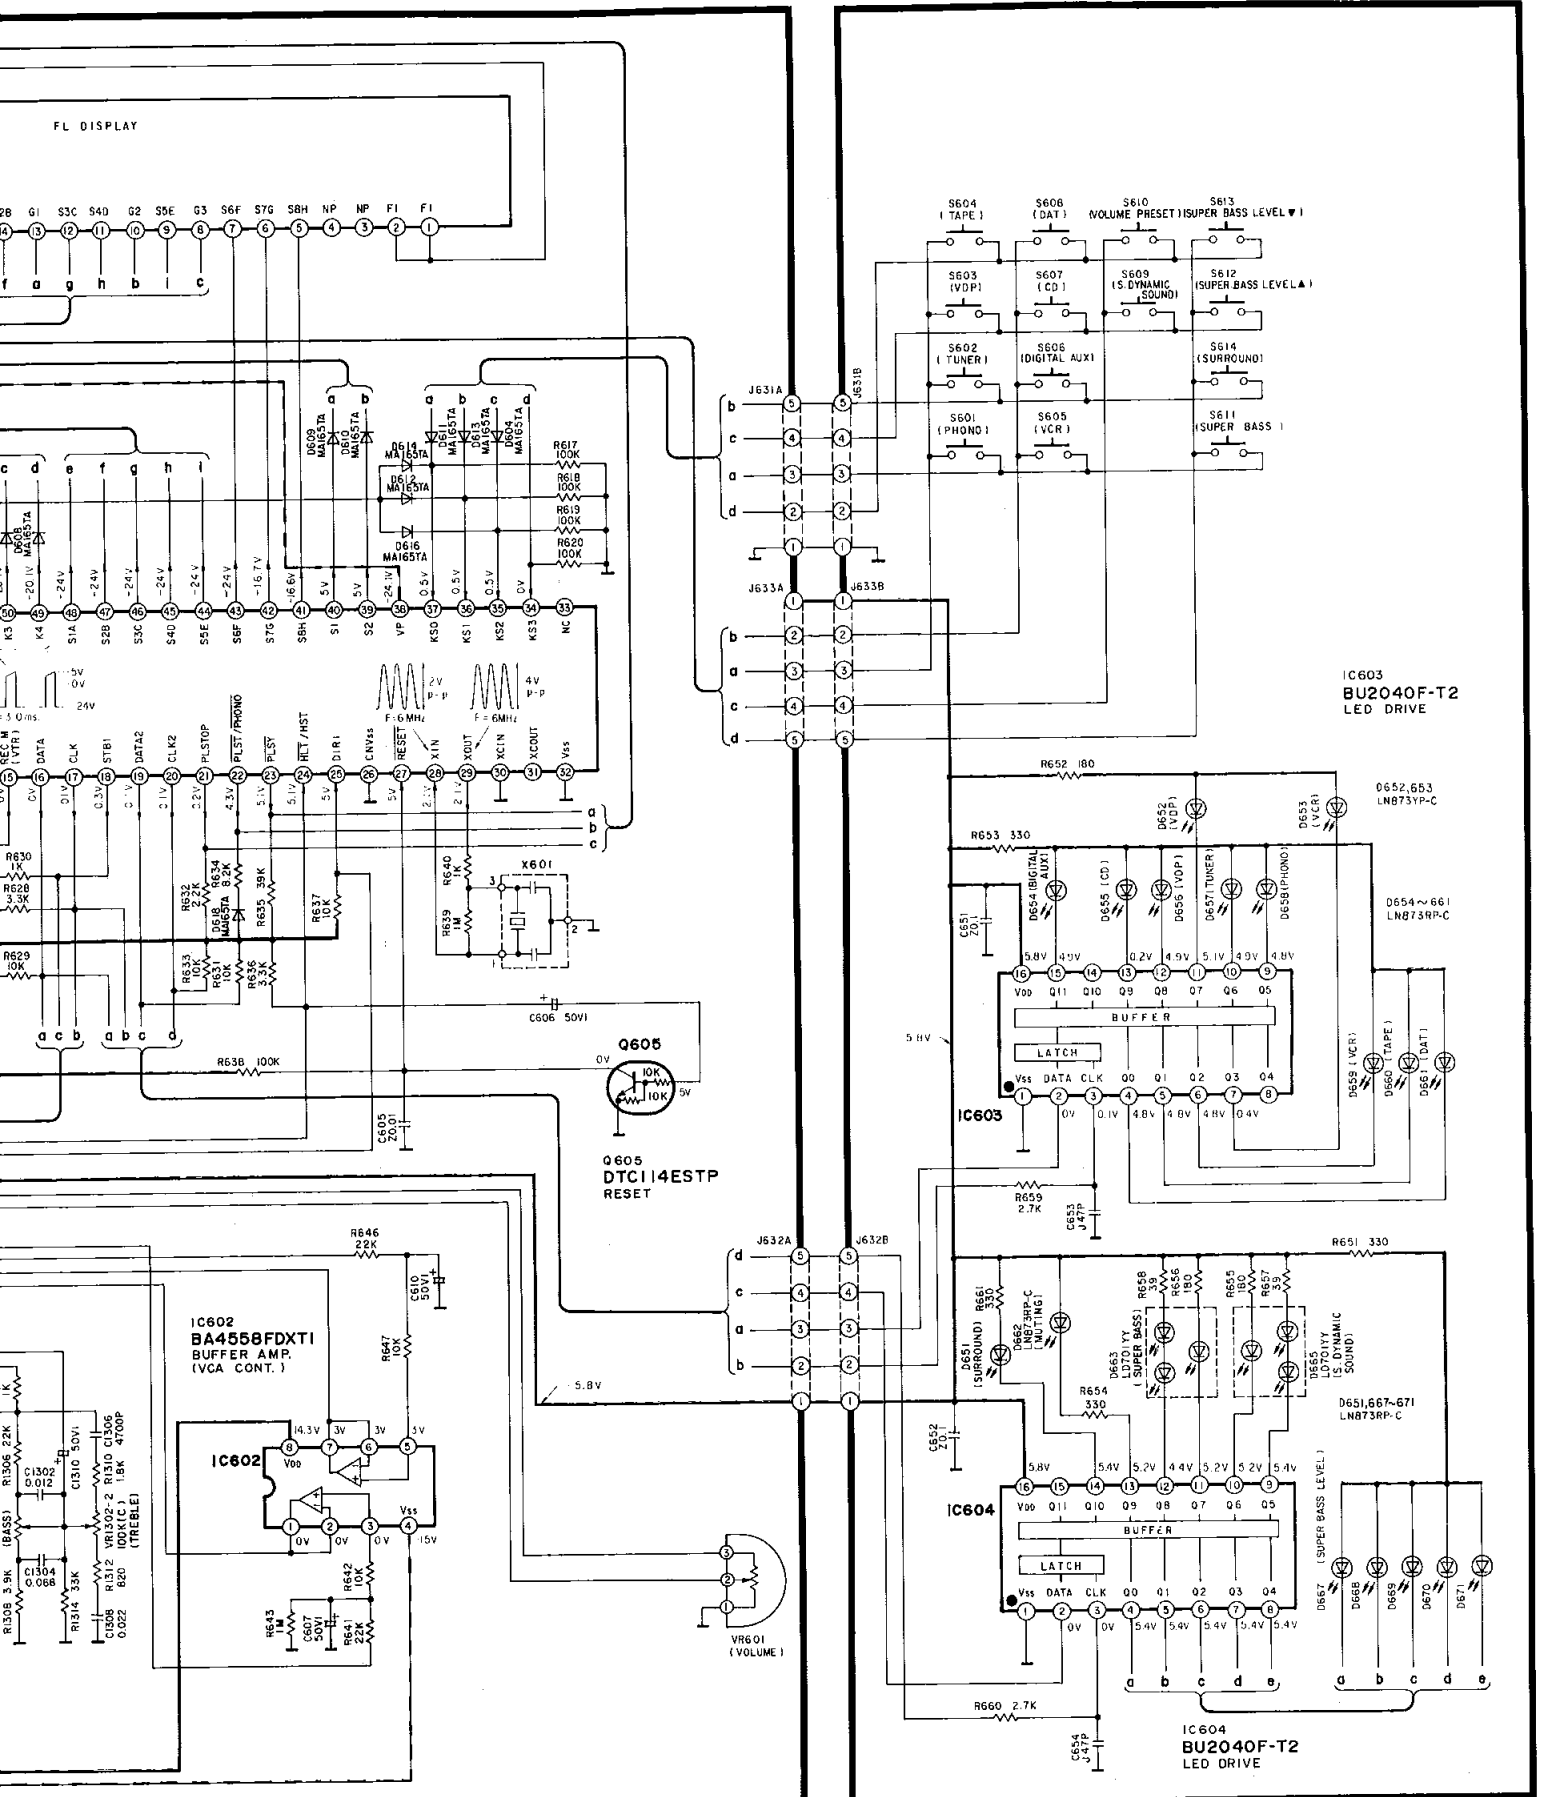

1. Remove the 4 heat melted posts on the chassis with a pair of nippers or similar tool.
2. To replace the foot (RKA0011-2) on the chassis, melt the 4 posts with a soldering iron.

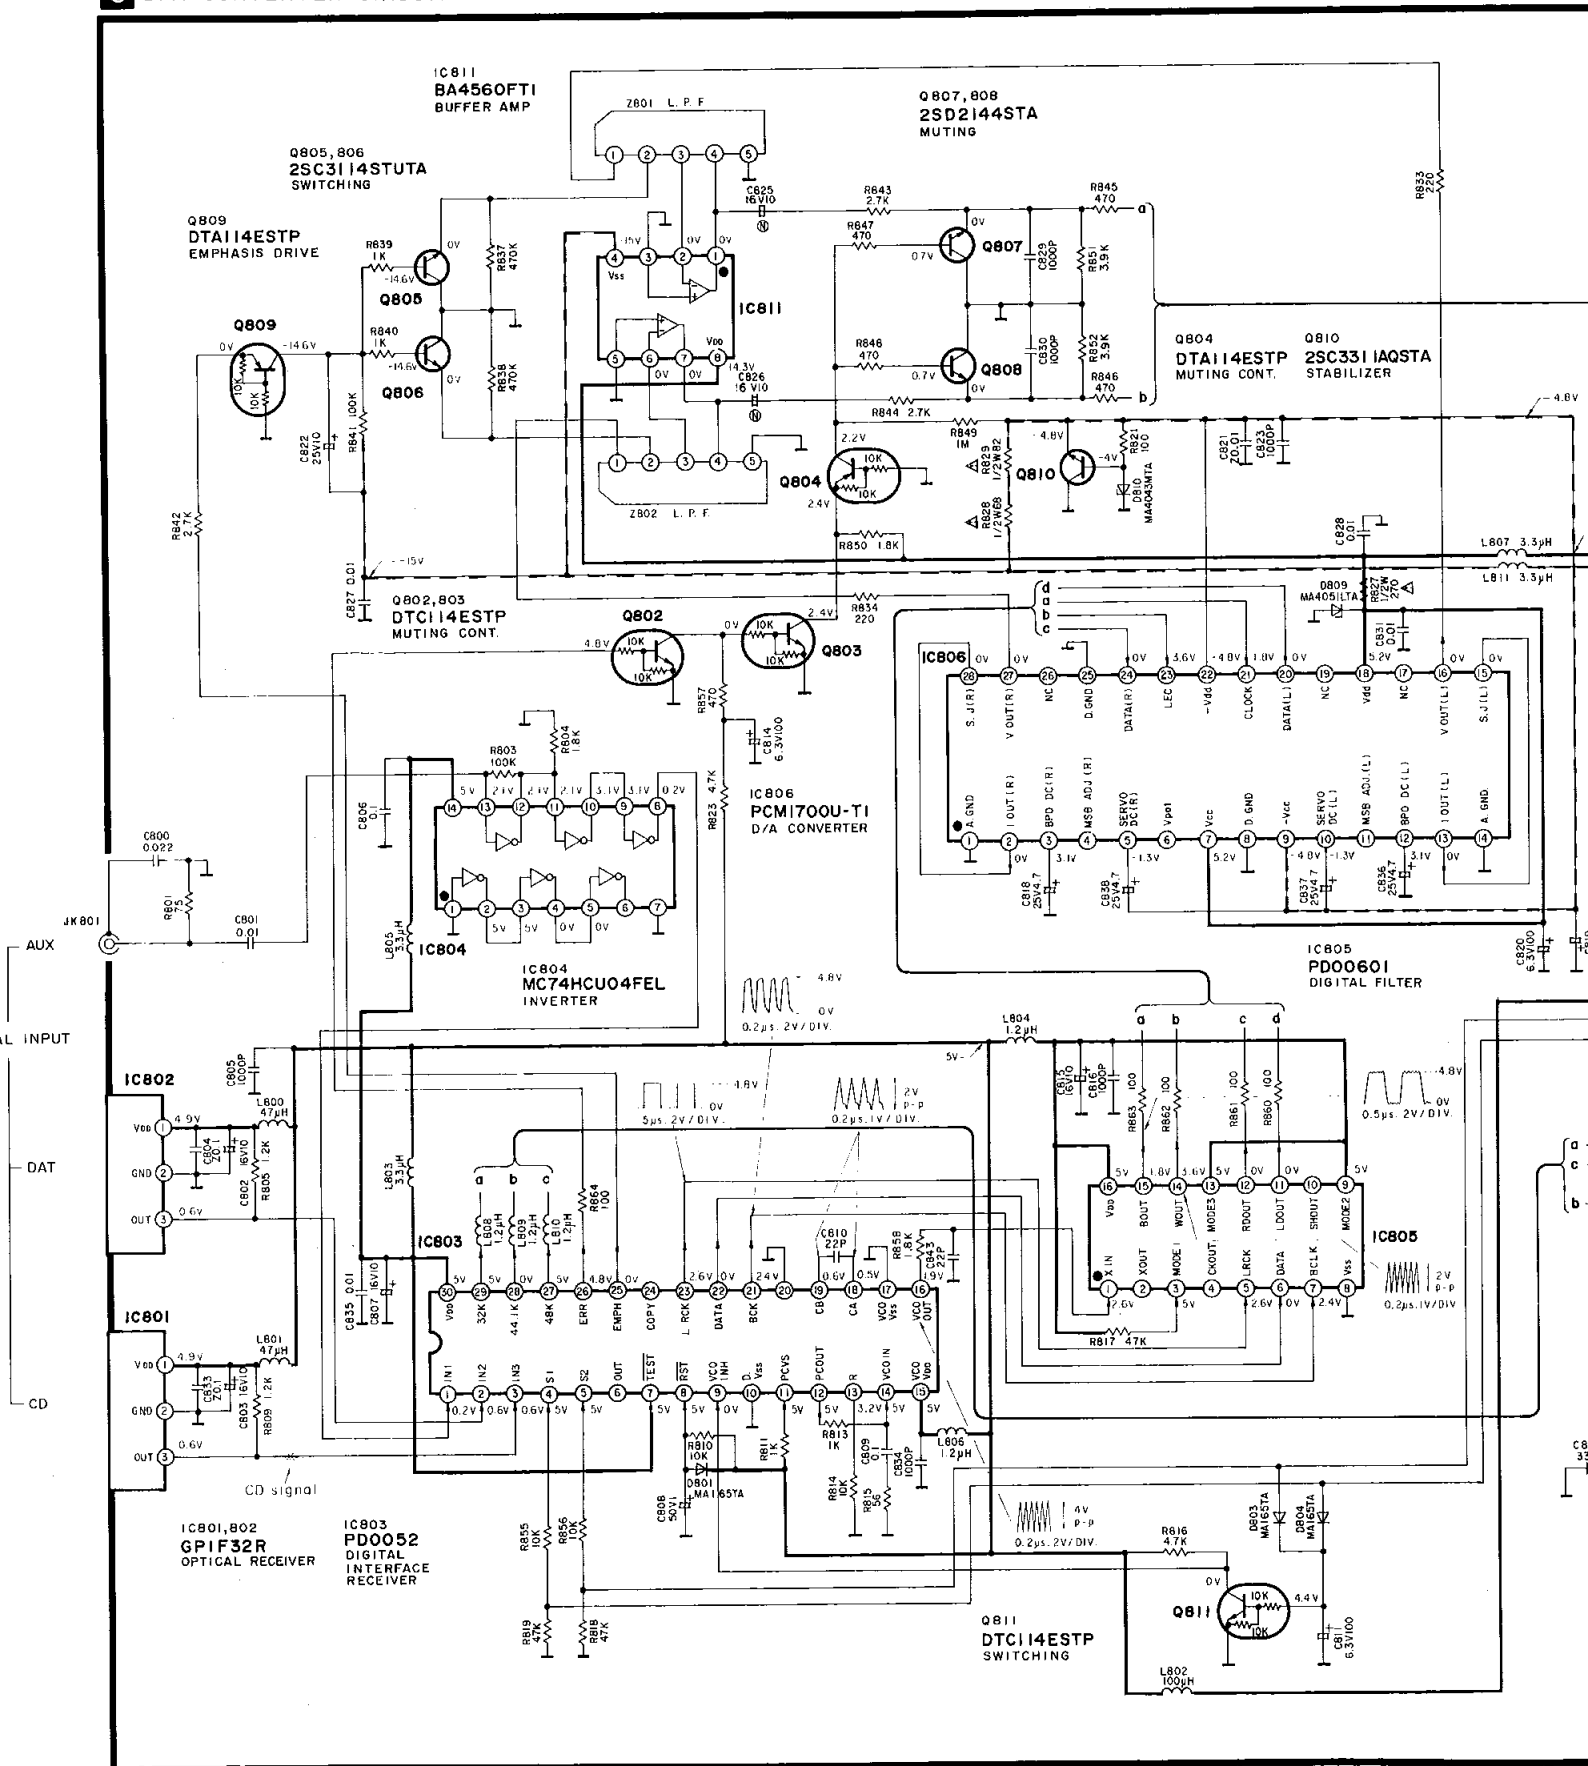

A horizontal number line with tick marks at each integer from 1 to 6. The numbers 1, 2, 3, 4, 5, and 6 are written above their respective tick marks.

• Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard. Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.

• Important safety notice:

Components identified by  $\Delta$  mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.

### •Caution!

IC and LSI are sensitive to static electricity.

Secondary trouble can be prevented by taking care during repair.

• Cover the parts boxes made of plastics with aluminum foil.

• Ground the soldering iron.

• Put a conductive mat on the work table.

• Do not touch the legs of IC or LSI with the fingers directly.

# REPLACEMENT PARTS LIST

Notes : \* Important safety notice:

Components identified by  $\Delta$  mark have special characteristics important for safety. When replacing any of these components use only manufacturer's specified parts.

\* The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area.)  
Parts without these indications can be used for all areas.

| Ref. No.   | Part No.     | Part Name & Description   | Remarks | Ref. No.    | Part No.     | Part Name & Description | Remarks |
|------------|--------------|---------------------------|---------|-------------|--------------|-------------------------|---------|
